Victims' rights in Europe evolved in the past years, and the European Commission launched its first ever Victims' Rights Strategy in 2020.

What are important elements of this Strategy? What are the implications for probation, prison and restorative justice? How could these fields support victims' rights and make their work more informed on victims' needs? What about vulnerable victims, such as victims in detention?

This webinar explores the intersections between victims' rights and offender reintegration, and that how these fields can mutually support each other.
